

since its future auto industry company build an teleportable showroom for the projects this transport showroom it can move on different places for promoting

the deauto projects/cars for example it can be in festival or teleporting the showroom to different places without building a showroom in different areas And the robots ai drone in the showroom will serve humans

closer shot inside the transport showroom here where you can customize your purchases and get all info about deauto projects

"The future will increasingly belong to people who leave behind the cathedral and embrace the bazaar."
